(54) Title: SKIN CARE PAD

(57) Abstract: The invention relates to a skin care pad comprising exfoliating elements (4) which are distributed between at least one first fibrous layer (2) and a second fibrous layer (6), said second layer having a lower basis weight than the first fibrous layer. In this way, the inventive pad can be used daily, in order to exfoliate and massage the skin and to remove make-up.

(57) Abrégé : La présente invention porte sur un tampon pour le soin de la peau comprenant des éléments gommants (4) répartis entre au moins une première couche fibreuse (2) et une seconde couche fibreuse (6) de plus faible grammage que la première couche fibreuse. Le tampon de l'invention permet ainsi un usage quotidien ; il peut être utilisé à la fois pour le gommage, le massage et le démaquillage de la peau.
